## Study Tips

*This product will provide you with questions and answers carefully compiled and written by our Expert Senior Certified Staff. Our practice questions are designed to help you learn the concepts behind the questions rather than be a strict memorization tool.*

### Important Note:

#### **Please Read Carefully**

*Repeated readings of our Pass-Guaranteed.com Practice Exam will increase your comprehension. We constantly add to and update our Practice Exams with new questions, answers and explanations, so check that you have the latest version of this Practice Exam before you take your exam.*

*For security purposes, each PDF file is encrypted with a unique serial number associated With your Pass-Guaranteed.com account information. In accordance with International Copyright Law, Pass-Guaranteed.com reserves the right to take legal action against you should we find copies of this PDF file distributed to other parties.*

#### **Update Notifications (Latest Version)**

*We are constantly reviewing our products. New material is added and old material is revised. Free Updates are available for 180 days after purchase. If you purchased a bundle, you will have Free Updates for 1 YEAR!*

*You can signup to our newsletter for instant notification whenever an update is released by becoming a Pass-Guaranteed.com member at: <http://www.pass-guaranteed.com/log.htm>*

*By becoming a Pass-Guaranteed.com member, you also get a chance to win a FREE Practice Exam of your choosing. We give away 3 Pass-Guaranteed.com Practice Exams every week to 3 lucky winners.*

#### **Pass-Guaranteed.com Product Specials**

*Pass-Guaranteed.com Custom Bundle Requests, cover all Pass-Guaranteed.com Products!!! You can visit our Special Bundle Discounts from Pass-Guaranteed.com or make your own Custom Bundle Request with Pass-Guaranteed.com here: <http://www.pass-guaranteed.com/bundles.htm>*

*Pass-Guaranteed.com Custom Bundle Request Form let's you create your own Bundle Of Products!!! You can select and group any of our products for your Custom Bundle and we will give you up to a **50% Discount** on your Custom Bundle Package. This includes our [Practice Test Questions](#), [Online Course Tutorials](#), [Study Guides](#), [Lab Scenarios](#) and our [Certified Online Instructor](#) service.*

*Please visit: <http://www.pass-guaranteed.com/custom-request.htm> If you would like to purchase a Custom Bundle from Pass-Guaranteed.com.*

**QUESTION: 1**

A small company is rapidly growing, and the administrators have noticed that their file server storage has been growing dramatically. The administrators need to limit usage of storage space. Which of the following is the best recommendation for the administrators to limit users to a 200 MB allotted amount?

- A. Set Disk Quotas by enabling Quota Management on disks with 200 MB.
- B. Send an email to all users to limit their storage to 200 MB per folder.
- C. Identify all users storing more than 200 MB and apply compression to those files.
- D. Use the Disk Management snap-in to create 200 MB volumes for each user and assign each user access to their disk space.

**Answer: A**

**QUESTION: 2**

An administrator at a medium-size company needs to revise the company's backup/restore strategy for their Web servers. The company's backup requirements are:

1. The backup window has to be as small as possible
2. The backup strategy has to be cost effective
3. The recovery of an individual server is not time critical, since many Web servers are available.
4. Business partners process most of their orders between Monday and Friday. Weekends are traditionally quiet.

Which of the following backup/restore strategies is the most appropriate?

- A. Full Backup: Monday-Friday
- B. System State Backups: Monday-Friday
- C. Full Backup: Saturday, Differential Backups: Monday-Friday
- D. Full Backup: Saturday, Incremental Backups: Monday-Friday

**Answer: D**

**QUESTION: 3**

An administrator wants to know the serial number of a server that has just been brought online in the network. The IBM Director server is installed and all servers are running the Director agent. Which two of the following actions could the administrator take?

- A. Drag and drop the Asset I task on to the server in the Groups pane.
- B. Drag and drop the inventory task on to the server in the Groups pane.
- C. Drag and drop the Asset ID task on to the server in the Group Content pane.
- D. Drag and drop the Asset Description task on to the server in the Group pan.
- E. Drag and drop the inventory task on to the servr in the Group Contents pane.

**Answer: C, E**

**QUESTION: 4**

Pass.com has an IBM eServer xSeries 365 (with IBM Director Server installed) and an IBM eServer xSeries 345. The administrator properly cables and terminals the ASM interconnect network between the RSA II of the xSeries 365 and the RS-485 ports of the xSeries 345. The two systems are on the same subnet and can ping each other Microsoft Windows 2003 and all required drivers are installed on both machines.

When using the Web browser interface to the RSA II, the ISMP on the xSeries 345 can be accessed. However, when using the MPA task in IBM Director, there is no connection to the ISMP on the xSeries 345.

Which of the following steps should the administrator take to resolve the issue?

- A. Use the Communications subtask to configure an IP Address for the ISMP on the xSeries 345.
- B. Install IBM Director Agent on the xSeries 345. Use IBM Director on the xSeries 365 to discover the xSeries 345 and its Service Processor.
- C. Use the Management Processor Assistant to select the xSeries 345 from the xSeries 365.
- D. Uninstall the Service Processor Assistant to select the xSeries 345 and then install IBM Director Agent on it. Use IBM Director on the xSeries 365 to discover the xSeries 345 and its Service Processor.

**Answer: B**

**QUESTION: 5**

While testing a configuration of EXP devices for Pass.com, a Business Partner configures two scenarios:

Scenario 1: Sixteen (16) 73GB 10K rpm drives in two EXP 400s.

Scenario 2: Eleven (11) 146 GB 15k rpm drivers in one EXP 400.

With all other variables, such as server model, number of CPUs, memory ServeRAIDcontroller, application operating system, being equal, the Business Partner expected scenario 2 to perform better than Scenario2. However, this was not the case. Scenario 1 and 2 performed almost exactly the same.

Which of the following would best explain why this is case?

- A. The ServRAID controller has reached its maximum capacity.
- B. Spreading the data across two EXPs slows the performance.
- C. Larger capacity drives provide better performance than smaller capacity drives.
- D. Fewer 15k rpm drives can provide the same performance as multiple 10k rpm drives.

**Answer: D**

**QUESTION: 6**

Pass.com's Web Development department would like to purchase one server for its development. They do not have any server racks and have the following requirements:

1. Dual processor
2. Up to 4 GB RAM
3. 10 developers will access the server
4. Local storage of 200 GB
5. RAID protection
6. Database and Web services to run off one server
7. Data needs to be backed up on an internal DLT Drive

Which of the following xSeries servers should be recommended for this development environment?

- A. x206
- B. x225
- C. x255
- D. x345

**Answer: B**

**QUESTION: 7**

Pass.com has multiple Web servers and application servers. The application servers run an application that is processor and memory intensive. The customer wants to standardize all of their servers systems on 64-bit platforms and one operating system. Before moving to 64-bit hardware and a 64-bit Microsoft Windows platform, which two of the following might affect this customer?

- A. 64-bit Windows will not support internet information Service.
- B. ASP NET is not supported in 64-bit versions of Windows Server 2003.
- C. 64-bit Windows only supports applications and database, not web services.
- D. The .NET Framework is not supported in 64-bit versions of Windows Server 2003.
- E. The 64-bit Active Directory Update needs to be applied to all existing Domain Controllers.

**Answer: B, D**

**QUESTION: 8**

A rapidly-growing company is adding an Human Resources department. They have decided to use a robust application and have already purchased six 4-processor licenses. A representative from the application vendor has advised them of the need for extensive memory allocation, about 2 GB per CPU. The representative also advised them that the

application could take advantage of CPU hyperthreading technology, without adding additional CPU licenses.

Which of the following hardware and operating system environments should be recommended to the customer?

A. Six IBM xSeries 345 servers with two CPUs and hyperthreading enabled, 8 GB RAM, Windows 2003, Standard Edition.

B. Six IBM xSeries 365 servers with four CPUs and hyperthreading enabled, 8 GB RAM, Windows 2003, Standard Edition

C. Six IBM xSeries 345 servers with two CPUs and hyperthreading enabled, 8 GB RAM, Windows 2003, Enterprise Edition

D. Six IBM xSeries 365 servers with four CPUs and hyperthreading enabled, 8 GB RAM, Windows 2003, Enterprise Edition

**Answer: D**

**QUESTION: 9**

A Microsoft Windows 2003 Server has crashed and will no longer boot successfully. Which two of the following methods can be used to start this server using the Recovery CONSOLE?

A. If the Recovery Console is installed, it automatically boots up on a crashed system.

B. If the Recovery CONSOLE IS INSTALLED ONTO THE SYSTEM, IT MAY BE SELECTED AS A BOOT OPTION.

C. It is possible to create and use a DOS formatted bootable floppy disk containing all components required for the Recovery Console.

D. Recovery Console is an integral part of Windows Server 2003 and can be invoked on boot up by pressing F8 and selecting Recovery console.

E. If the server is booted with the Windows 2003 Server CD-ROM inserted, it is possible to launch the Recovery console from the Welcome screen.

**Answer: B, E**

**QUESTION: 10**

A new Network Card driver is installed on a Microsoft Windows 2000 file server. After rebooting the server, the Network Card is visible in the device manager, but no data is now being transferred. Which of the following is the fastest way to verify if the Network Card is working and if the TCP/IP stack was properly bounded to it?

*000-074 Demo – Pass-Guaranteed.com*

- A. Type NBTSTAT to show the connections to the servers.
- B. Open Device Manager and verify that TCP/IP is bound properly
- C. Ping the loopback adapter (127.0.0.1) to verify that TCP/IP is bound properly
- D. Ping the loopback adapter (169.254.0.1) to verify that TCP/IP is bound properly.

**Answer: C**
