QUESTION 1:
You're installing the Branch Office Application software on older server hardware that doesn't support bootable CD drives.

How can you install the software?

A. You can't install the Application software without a bootable CD

B. Create a bootable diskette and install the appropriate DOS CD drivers on it.

C. Create a bootable diskette and install the IPCONN drivers from the Novell Client CD on it; then install across the wire from another server.

D. Mount the installation CD as a volume on another NetWare server, then configures a bootable diskette with the IP Server Connection Utility from the Novell Client CD and install over the wire.

Answer: A

QUESTION 2:
You're installing a new NetWare 6.5 server into an existing tree. The tree already contains two NetWare 4.2 servers with Support Pack 5 applied, three NetWare 5.0 servers with Support Pack 4 applied, and two NetWare 5.1 servers with Support Pack 3 applied.

Will the installation be successful?

A. Yes, the existing network meets prerequisite requirements.
B. No, the existing NetWare 5.0 servers must have Support Pack 6 or later applied.
C. No, the existing NetWare 5.1 servers must have Support Pack 6a or later applied.
D. No, the existing NetWare 4.2 servers must have Support Pack 6a or later installed.
E. No, the NetWare 4.2 servers must be removed from the tree before NetWare 6.5 can be installed.

Answer: D

QUESTION 3:
A Netware 4.2 server is currently servicing one of your branch offices. All of the user's data is saved on the USERS volume. You are deploying a Branch Office solution. To save time, you want to install the Branch Office Application software on top of the Netware 4.2 server and then simply mount the existing USERS volume as an Application volume.

Will this work?

A. Yes, Netware 4.2 volumes are compatible with the Application software.

B. No, Netware 4.2 volumes are incompatible with the Application software.

C. No, the Application installation program removes all partitions and re-images the entire drive.

D. No, the Application software may corrupt the data on the Netware 4.2 volume when it is mounted.

E. Yes, but only if you apply load LONG.NAM and add the long name space to USERS before installing the Appliance.

Answer: C

QUESTION 4:
Given that the workstation's CD drive is assigned drive letter D.

What is the Migration Wizard 6.5 location and filename?

A. D:\MIGRTWZD.EXE
B. D:\MIGRTWZD65.EXE
C. D:\PRODUCTS\MIGRTWZD.EXE
D. D:\INSTALL\MIGRTWZD65.EXE
E. D:\PRODUCTS\MIGRTWZD\MIGRTWZD.EXE
F. D:\PRODUCTS\MIGRTWZD\MIGRTWZD65.EXE

Answer: E

QUESTION 5:
You want to migrate an existing NetWare 6.0 server to NetWare 6.5 server running on newer, faster server hardware.

Which strategies will work?

A. Install NetWare 6.5 on the newer server hardware and migrate the source NetWare 6.0 server to it.

B. Install NetWare 6.5 on the newer server hardware and migrate the source NetWare 6.0 server to it using the /MIGRATE60 switch.

C. Install NetWare 6.5 on the newer server hardware and migrate the source NetWare 6.0 server to it. Then upgrade the destination server to NetWare 6.5 server.

D. Perform an In-Place Upgrade to NetWare 6.5 on the source server. Install NetWare 6.5 on the destination server and migrate the source server to the destination server.

Answer: A D

QUESTION 6:

A NetWare 4.2 server is currently servicing one of your branch offices. All of the user's data is saved on the USERS volume. You are deploying a Branch Office **s**olution. To save time, you want to install the Branch Office Appliance software on top of the NetWare 4.2 server and then simply mount the existing USERS volume as an Appliance volume.

Will this work?

A. Yes, NetWare 4.2 volumes are compatible with the Appliance software.

B. No, NetWare 4.2 volumes are incompatible with the Appliance software.

C. No, the Appliance installation program removes all partitions and re-images the entire drive.

D. No, the Appliance software may corrupt the data on the NetWare 4.2 volume when it is mounted.

E. Yes, but only if you apply load LONG.NAM and add the long name space to USERS before installing the Appliance.

Answer: C

QUESTION 7:
Your organization has three regional Windows NT Domains for each geographical location. A Windows NT 4 server hosts each domain. You also have a NetWare 5.1 server providing services for your organization's headquarters. You've just installed a high-end NetWare 6.5 server into its own tree and want to consolidate all the servers in your organization to the new server using the Server Consolidation Utility2.5.

Can this be done?

A. Yes, the network meets the prerequisite requirements.

B. No, the Server Consolidation Utility 2.5 can't consolidate Windows NT Domains.

C. No, multiple Domains can't be consolidated to a NetWare 6.5 server using the Server

Consolidation Utility 2.5.

D. No, NetWare 5.1 servers can't be consolidated to a NetWare 6.5 server using the Server Consolidation Utility 2.5.

E. No, you can't consolidate a mixture of NT Domains and NetWare servers to a NetWare 6.5 server using the Server Consolidation Utility 2.5.

Answer: A

QUESTION 8:
You work as an administrator at Pass .com. You manage a network with four servers; Pass 1, Pass 2, Pass 3, Pass 4, Pass 1 has the master replica of the root partition. You've implemented DirXML in your network to synchronize eDirectory with a Windows NT domain. You downloaded and installed the DirXML iManager plug-ins on Pass 1.

When you run iManager from Pass 2, the DirXML roles aren't visible. What is the resolution to this issue?

A. You must manually install the DirXML iManager plug-ins on Pass 2

B. You must place a read/write replica of the root partition on Pass 2

C. You must configure Pass 1 to synchronize its iManager plug-ins with Pass 2

D. You must place a read/write replica of the partition containing the RBS objects on Pass 2

E. You must create a filtered replica of the root partition containing only users and groups on Pass 2

F. It can't be resolved. You can only have one instance of a given iManager plug-in in each eDirectory tree

Answer: A

QUESTION 9:
You manage 3 Apache Web Servers running on three different NetWare 6.5 servers. You have configured your web servers to share a common configuration stored in eDirectory. You assigned your assistant to make a change to the web server configuration. However, instead of using Apache Manager, he simple edited the HTTPD.CONF file on one individual server.

What is the result of this action?

63 Demo – 100% Money Back Guaranteed!!!

A. Only the local Apache Web Server will use this new configuration when it is restarted

B. The local Apache Web Server will abend when it detects the conflicting configurations

C. All apache web servers in the server group will abend when the altered configuration is replicated by the configuration daemon

D. All apache web servers in the server group will ignore the configuration change. Only changes made in eDirectory with Apache Manager are used.

E. All Apache Web Servers in the server group will use the new configuration when the configuration daemon detects the changed file and replicates it to all other servers

Answer: E

QUESTION 10:
You've configured a Branch Office System to use Automatic User Provisioning. When users attempt to log in to the appliance for the first time, authentication fails. The appliance is running on a server with 512 MB of RAM, a Pentium III 500 MHz CPU, and a 40 GB hard disk drive. The users are using Windows 2000 Professional with Novell Client 4.9 installed.

What is causing the problem?

A. The Appliance requires at least 1 GB of RAM
B. The Appliance requires a 1 GHz or faster CPU
C. The workstation must be upgraded to Windows XP Home
D. Novell Client 4.9 isn't compatible with Universal Password
E. NICI must be disabled on the Novell Client 4.9 during the first login
F. NMAS must be disabled on the Novell Client 4.9 during the first login

Answer: F
